DETAILED ACTION

1. The amendment filed 10/19/09 has been entered. Claim 67 has been canceled. New claim 68 has been added. Claims 1, 5-13, 17, 18, 20, 21, 27, 30-33, 35, 38, 39, 41, 43 and 68 are pending in the application. Claims 7-11 have been withdrawn from consideration. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 5, 6, 12, 13, 17, 18, 20, 21, 27, 30-33, 35, 38, 39, 41, 43 and 68 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites the negative limitation "wherein the device does not require the use of two radiation beams to determine the observable change" in lines 5-6. Similarly, Claim 41 recites the negative limitation "wherein the device does not require the use of two radiation beams to determine the change in the radiation sensitive material" in lines 7-8 and Claim 68 recites the negative limitation "wherein the image created by the radiation source does not require two beams for determining the dose distribution" in lines 5-6. However, the instant disclosure at the time of filing does not appear to provide sufficient support for these negative limitations in order to

reasonably convey to one skilled in the art that the inventors had possession of the claimed invention at the time the application was filed.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 5, 6, 12, 13, 17, 18, 20, 21, 27, 30-33, 35, 38, 39, 41, 43 and 68 have been considered but are moot in view of the new ground(s) of rejection. The Examiner notes that the prior art rejections have been withdrawn but may be reinstated upon removal of the new matter from the instant claims.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
